## PROJECTS

### Netflix Clone
**HTML,CSS,Javascript**

- Developed a Netflix Clone using HTML, CSS, and JavaScript.
- It features responsive design for seamless viewing on different devices, includes search and browsing capabilities, and replicates key features such as media playback and user profiles to provide an immersive streaming experience.
- Implemented interactive UI elements and dynamic content rendering for an authentic user experience.

### Temperature Converter
**HTML,CSS,Javascript**

- Created a fully functional Temperature Converter website using HTML, CSS, and JavaScript.
- Incorporated real-time conversion algorithms to enhance user experience and accuracy in temperature calculations.

### Chatroom
**HTML,CSS,Javascript,Node js,Express Js**

- Created a chatroom app integrates HTML, CSS, JavaScript, Node.js, and Express.js to deliver a responsive and interactive platform for real-time messaging. It combines server-side capabilities with a polished frontend, ensuring a smooth user experience.

### Calculator
**HTML,CSS,Javascript**

- Created a fully functional calculator that performs basic arithmetic operations such as addition, subtraction, multiplication, and division using HTML, CSS, and JavaScript.

## EDUCATION

### B.Tech in Information Technology
**SASI Institute of Technology and Engineering**

📅 Dec 2021 – ongoing        📍 Tadepalligudem

8.44 CGPA (upto III-II)

### Intermediate,MPC
**Tirumala Junior Kalasala**

📅 2019 – 2021        📍 Rajahmundry

95.4%

### SSC
**Vignan (E.M) High School**
